Defining a Humanitarian Shelter and Settlements Research Agenda

Aaron Opdyke | PhD, PE, MIEAust, MASCE
Lecturer | Humanitarian Engineering
School of Civil Engineering
Faculty of Engineering and Information Technology
The University of Sydney
Motivation

– Synthesize and gain consensus on research priorities for the humanitarian shelter and settlements sector.

– Collaboratively define a research agenda to guide NGOs, governments, and academic institutions in addressing key evidence gaps.
Identifying Research Gaps

- **Open online survey**: Late 2017
  - July – August 2018
- **Workshops and forums**: Mid-2018
- **Expert panel**: Late 2018
- **Interviews**: UK Shelter Forum
- **White paper**: December 2018
  - (available for public comments)
- **Final report**: December 2018
Your Input – Research Priorities

- Take a minute to write down top 5 research priorities.
  - For remote attendees, email to aaron.opdyke@sydney.edu.au
  - For in-person attendees, please drop comments at the front during the coffee/tea break
- Please try to be specific, but also keep the research generalizable.

Example:

Bad: Cash

What about cash needs more evidence?

Good: Impact of cash programming on beneficiary livelihoods
